                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              COUNTRY: U.S.A.

ZIP: 11530

ZIP: 11530

COMPUTER READABLE FORM:
MEDIUM TYPE: FLOPPY disk
CONFUTER: IBM PC compatible
OPERATING SYSTEM: PC-DOS/MS-DOS
SOFTWARE: Patentin Release #1.0, Version #1.25
CURRENT APPLICATION DATA:
APPLICATION NUMBER: US/07/912,900
FILING DATE: 19920713
CLASSIFICATION: 800
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            E: Scully, Scott, Murphy & Presser

Sequence 4, Application US/09025639

Patent No. 6365346

GENERAL INFORMATION:
APPLICANT: Kurn, Nurith
APPLICANT: Ratel, Rajesh D.
TITLE OF INVENTION: Quantitative Determination of Nucleic
TITLE OF INVENTION: Acid Amplification Products
TITLE OF INVENTION: Acid Amplification Products
TITLE OF INVENTION: Acid Amplification Products
CURRENT APPLICATION NUMBER: US/09/025,639
CURRENT PLING DATE: 1998-02-18
NUMBER OF SEQ ID NOS: 8

SOFTWARE: FastSEQ for Windows Version 3.0

Sequence 5, Application US/09250075

Patent No. 6207819

GENERAL INFORMATION:
APPLICANT: Mancharan, Muthiah
APPLICANT: Mancharan, Muthiah
APPLICANT: Martin A
TITLE OF INVENTION: Ocmpounds Processes And Intermediates For Synthesis Of
TITLE OF INVENTION: Mixed Backbone Oligomeric Compounds
CURRENT FILING DATE: 1999-02-12

NUMBER OF SEQ ID NOS: 12

SEQ ID NO 5

LENGTH: 17

TYPE: DNA

TYPE: DNA

CREANISM: Artificial Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  .

Sequence 31, Application US/09016520A

Patent No. 6127533

GENERAL INFORMATION:
APPLICANT: Cook, Phillip D

APPLICANT: Manoharan, Muthiah
APPLICANT: Rawasaki, Andrew
TITLE OF INVENTION: Aminooxy-Modified Oligonucleotides
FILE REFERENCE: 15152824

CURRENT PALING DATE: 1998-01-30

EARLIER APPLICATION NUMBER: 60/037,143

EARLIER APPLICATION NUMBER: 60/037,143

EARLIER PILING DATE: 1997-02-14

NUMBER OF EEQ ID NOS: 47

SOFTWARE: Patentin Ver. 2.1
                                                                                                                                                                                                                                                                                                                                                                           Length 19
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                       FEATURE:

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Patent NO. Deloc.

GENERAL INFORMATION:

APPLICANT: Heller, Michael J.

APPLICANT: Tu. Eugene
APPLICANT: Evans, Glen A.

APPLICANT: Sosnowski, Ronald G.

TITLE OF INVENTION: METHODS FOR ELECTRONIC TRANSPORT IN MOLECULAR.

TITLE OF INVENTION: BIOLOGICAL ANNAYSIS AND DIAGNOSTICS

TITLE OF INVENTION: BIOLOGICAL ANNAYSIS AND DIAGNOSTICS

CURRENT APPLICATION NUMBER: US/08/726,278

CURRENT APPLICATION NUMBER: 08/271,882
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      OTHER INFORMATION: Description of Artificial Sequence: Synthetic OTHER INFORMATION: Sequence NAME/KEY: misc feature LOCATION: (18) OTHER INFORMATION: (15)...(18) OTHER INFORMATION: 2'-methyleneiminooxyethoxy US-09-477-902-44
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   .
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 ·

Sequence 17, Application US/09303586

Patent No. 6369209

GENERAL INFORMATION:
APPLICANT: Manoharan, Muthiah
APPLICANT: Mohan, Venkatraman
TITLE OF INVENTION: Oligonuclectides Having A DNA Form And B-DNA Form Confirmationa
FILE REFERENCE: ISS3310
CURRENT APPLICATION NUMBER: US/09/303,586
CURRENT FILING DATE: 1999-05-03
NUMBER OF SEQ ID NOS: 34
SOFTWARE: PatentIn version 3.0
                                           APPLICANT: Mohan, Venkatraman
TITLE OF INVENTION: Oligonucleotides Having A DNA Form And B-DNA Form Confirmations
TITLE REFERENCE: ISSU3310
CURRENT APPLICATION NUMBER: US/09/303,586
CURRENT APPLICATION NUMBER: US/09/303,586
NUMBER OF SEQ ID NOS: 34
SEQ TONO: 16
LENGTHR: 19
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              Gaps
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           0

Sequence 26, Application US/09303586

Sequence 26, Application US/09303586

GENERAL INFORMATION:
APPLICANT: Manoharan, Muthiah
APPLICANT: Mohan, Venkatramah
TITLE OF INVENTION: Oligonuclectides Having A DNA Form And B-DNA Form Confirmational
TITLE OF INVENTION: UNMBER: US/09/303,586

CURRENT APPLICATION UNMBER: US/09/303,586

CURRENT PILING DATE: 1999-05-03

NUMBER OF SEQ ID NOS: 34

SOFTWARE: PatentIn version 3.0

SEQ ID NO 26

LENGTH: 19

Sequence 6, Application US/09227782

Patent No. 640379

GENERAL INFORMATION:
APPLICANT: Kawasaki, Andrew M

APPLICANT: Rancharan, Muthiah
APPLICANT: Cook, Philip D

APPLICANT: Prakash, Thacha P

TITLE OF INVENTION: Regioselective Synthesis of 2'-0-Modified Nucleosides
FILE REFRENCE: ISIS3315

CURRENT APPLICATION NUMBER: US/09/227,782

CURRENT FILING DATE: 1999-01-08

NUMBER OF SEQ ID NOS: 28
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  TYPE: DNA ORGANISM: Artificial Sequence
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          19 AAAAAAAAAAAAAA 3
